Subject: CAPOS -- Let"s stop them before inundated!

Date: Monday, February 25, 2019 11:32:29 AM

Hello State of Montana Governor Bullock, Mayor of Missoula Engen, et al:

If you haven't seen this film, https://righttoharm.film/ , please, take an hour from your day, show it to your staff, teachers, city council, Board of Health, and other administrative staff, for starters. I thought I knew this subject, but the intensity and aggression of CAPO infestation in rural areas, their size, the atrocity of animal treatment, the level of toxins caught me by surprise. I just saw it last night at the Big Sky Film Festival here in Missoula (great festival by the way!!)

We, as a state, and here in Missoula, and in Missoula County, need to address this problem before it inundates us. Dependent on ground water as we are, CAPOS would destroy our fragile eco systems! In the film, Wisconsin has decided to move aggressively to place a moratorium on CAPOS (concentrated corporate agriculture -- enormous warehouses of thousands of cows, hogs, chickens stuffed in, toxins flow into groundwater, nearby streams, people getting terribly sick --- see the film!) until they can figure out how to legislate a more humane law that will protect human health from the level of air and water pollution that results from allowing them.

https://righttoharm.film/

Thank you for your time. Get a copy of the film and see it! Very well done.

Sincerely,

Peggy M. Miller
