Dear Council members,

Looking over the agenda tonight I found this proposed change.

An Ordinance Amending the Missoula Municipal Code Regarding Water Service Line Maintenance Responsibilities

I believe cost of the work should not be 100% responsible to the property owner without any limitations. $0-$6,000 is hard to swallow but doable. Over that amount and there should be some mutual shared cost with the Water system. Some service lines could be over $20,000 to repair which would really hurt an elderly, young or impoverished property owner.
