Hi, my name is Grace and i am a missoula resident. i am writing to voice my dissent as you consider hiring a white business to research racism in Missoula. We need to be listening to and hiring BIPOC for issues of racism. Show that you actually care about racism in our community by listening to the people it affects most.
This reminds me of photos of groups of men in power making decisions about reproductive laws, no women in the room. Does that make sense?! No.

Please reconsider this and instead invest in and listen to Black voices/businesses in our community.
Thank you!

Grace Kari
