**Description of Work:** 2021 CODES/SFR/ADD CONNECTING DECK AND REPLACE EXISTING DECKS/VB/R-3

Replace existing front and rear attached decks and add new connecting deck section along NW side of house. Total project approximately 1,188 square feet (calculated from plans: front section ~410 sq ft, rear section ~525 sq ft, connecting section ~253 sq ft). New deck will be 4'10" above grade with helical pier foundation system spaced 7' on center.

Construction includes:

2x12 joists spaced 16" on center

4x12 beams spanning 14'2"

Douglas Fir lumber framing

TimberTech Prime+ Collection composite decking

36" high guardrails with balusters spaced 8' on center per code requirements

Posts spaced 7' on center

Maximum post height 5'9" above grade

Deck attached to house via 2x12 ledger board with proper flashing

Helical pier foundation system per attached specifications

Stairs with handrails for access (details shown on plans)

Project includes removal and replacement of existing decks as noted on attached plans. All work to meet current International Residential Code and manufacturer specifications.

**Residential Subtype:** BRRRS - Reroof or Reside Residential

**ADU/TED:**

**Permit Number:** 2025-MSS-RES-00977

**Description of Work:** SFR/Installation of Sliding Glass Egress Door in Basement – Southwest Foundation Wall/VB/R-3

We propose to remove an existing basement window on the southwest-facing wall and enlarge the opening to install a 60" x 80" sliding glass door to serve as an IRC-compliant emergency egress. Location & Structure Details:

- The new door will be located on the southwest side of the rear foundation wall, where an existing window currently exists.
- The wall is constructed of cinder block (CMU), and we will cut into the foundation to expand the opening to fit the new door.
- The door will open to grade-level—no well is required.

## Door Specifications:

- The door is a pre-manufactured, clad sliding glass door with a clear opening area that meets or exceeds IRC Section R310.
- Dimensions: 60" wide x 80" tall (approx. 62" x 82" rough opening)
- The unit is operable from the inside without keys, tools, or special knowledge.

## Structural Modifications:

- A structural header will be installed above the new door to maintain wall integrity.
- Framing will be tied into the foundation with appropriate anchors, sill plate, and treated materials.

## Code Compliance (IRC R310):

- Net clear opening ? 5.7 sq ft
- Minimum height ? 24"
- Minimum width ? 20"
- Maximum interior sill height ? 44"
- Door opens directly to the outside at grade

## Drainage &amp; Exterior Work:

- Grading around the exterior will be verified to ensure water flows away from the opening.
- All work will be performed in accordance with the current adopted International Residential Code (2021 IRC).
