Hello, my friend
The company introduces domestic large plastic hollow production line to produce plastic pallet and plastic ton barrel. The products are widely used in food, chemical industry, medicine, coating, oil and other fields. The products have good wear resistance, strong impact resistance, good chemical corrosion resistance, high and low temperature resistance, moisture resistance, no rust, washing resistance, no mildew, and meet the requirements of health inspection. It is a necessary tool for modern storage and transportation of liquid products. In any case, we would appreciate your early reply!
Good wishes
Mr Cheng
