Subject:	Corruption and its control. Includes Northside Development.
Date:	Sunday, February 7, 2021 12:09:32 PM

Read the City of Missoula 2021 Winter Newsletter enclosed with your Latest water bill.
"Public Works & Mobility Department".
And you should know that you, the residents, who don't have your hands directly in how our City, (including the Cities Moneypot), was, is now, and will be stolen from you, in this grand pronouncement of another reorganization of now you see them now you don't actors in a long series of frauds and continuing cycle of Name and personnel hide the moles coverups (My honest opinion).
As the driving force, of this Created growth spurt, was a clique of Federal Money driven, "Elites", Banks, Developers, Lawyers, ex Politicians, their crony friends and Family and Realtor Organizations, and other directed "thief's", again in my opinion, directly related to the profiteers involved. I watched the lies, over the past 10 + years. And yes, it's directly connected to the same type of Corruption in Washington DC, and Nationwide.
Missoula Residents never had a real chance to control the direction of the City. Even the processes stated to allow you to participate, and to know, what was going on, has been rigged and manipulated, not shared and disclosed, for over a decade now. Even by those running the University, have been coordinating with the City frauds.
Look at past financial (forgiven City Loans included) remember Weiner, Jaffe, Rye, and others and housing actions, including their own Business, allowed and given to the North side developers by HUD (Housing and Human Services) and the City of Missoula over the past 20 years. Look at Council Member Taft (from Boston and related to President Taft), and other Council Members, who have relatives and as Employers and employees directly connected to City Projects, past, present, future, look at Domicratic Candidates past and present serving on and working for City Connected "Partnerships", look at Money given to Banks, like Stockmans driving the growth their saying is being forced on them. I could go on and on.
When you have a City Council Member say that it was the "Cold War" that caused 5th and 6th Streets in Missoula to be one way (now they've decide Main St and Front Street will be two way), you know something's terribly wrong with our City Government. Funny the Council Member didn't mention going "backwards" with "Streetcars" when she talked about the changes to 5th and 6th.

Don't approve the Northside Development. Decide what you want and put it out for Bids.

But then our Council Members never seem to have any original really City Government Resident related Nuts and Bolts Issue ideas of their own. Just transient popular broad distracting themes. Or they play cheerleader and rubber stampers to those already in control. And now it's the Federal Money that's in control.

Mixed use Development, in the end, is like a flushing toilet, that spins to prevent new ideas from emerging.
