Subject: MCAT CITY Contract Renewal

Hi Jim, I've attached an updated version of MCAT's contract with the City of Missoula. I highlighted the changes in red. Aside from changing the dates and MCAT's address there are two potential changes worth explaining.

I SCOPE OF PROFESSIONAL SERVICES

Educational and Government Access: As part of the moneys distributed by the City to MCAT, MCAT will hours per year of production assistance to the City to produce timely and informative municipal provide up to 1400 bulletin services, programs featuring various departments, Mayor and City Council topics, live cablecast of City Council meetings, Community Forum, City/County Planning Board meetings and City Council committee meetings, and other content and programs as recommended by the Government Channel Cable Advisory Committee.

I inserted "up to" because the 1400 hours are typically not fully utilized and MCAT 's auditor feel required to obtain a release from this provision every year.

VI MODIFICATIONS AND WAIVER
the second paragraph references a potential change in compensation if MCAT receives money from a Missoula County franchise agreement. This is likely to happen before next fiscal year but I don't know how much compensation MCAT might receive.

If no one is interested in this aspect of the agreement I suggest removing it. (bottom of page four)
