Dear City Council,

Please listen to the people of Missoula on this controversial project proposed by out of state people who don't seem to have any interest of the local struggling people of this town to find affordable housing.

The people need to be heard, and the City Council represent the people of this town, and this project does not represent the majority of what Missoulians want for our community. There need to be some open meetings and transparency about this project and it needs to happen now.

Thank you,

Brita Schneller
