Hello Council men and women,

I am writing each of you as a whole today, letting you know that I am in full support of the proposed Currents Center for Recreation and Creativity. I have met with Amy Ragsdale twice and she has explained the entire project.
I was uplifted by this idea.

I think it is really important to build something for community, most especially for children but/and for adults. To provide for everyone shows cohesive and supportive thinking for people before profit. So much building going on right now that is entirely apartments and houses.

A place for playing and creating, a place to be rather than going out to the store then back to house.

I feel it is dire that kids of all ages have a place, and this improves MIssoula quality by providing a variety of creative things to do.

Great spot, connected to Currents, baseball park, bike trail, near town, safe biking roads for the most part.
Missoula is changing before our eyes and this would anchor the feeling of welcoming and getting to know one another rather than a sea of strangers.

Please approve the design, adopt the conceptual design!!
