Summary Description and rationale of project and funding sources:

Project will improve pedestrian and bicyclist safety at the intersection of George Elmer Dr and Cattle Dr through the addition of pedestrian refuge islands and painted bike lanes on George Elmer Dr and the temporary narrowing of intersection corner radii. The proposed improvements will serve as an interim step towards the City's long-term plan of constructing a roundabout at the intersection. The project will leverage developer funding with Transportation Impact Fees.

History & Current Status: Impact if Cancelled or Delayed

A roundabout is a required subdivision condition for three area developments. The roundabout project has been delayed due to funding issues. The City has opted to forego the roundabout project, for the time being, as it will not be necessary from a traffic operations perspective in the near-term, but if this interim project is cancelled or delayed, pedestrian and bicyclist safety enhancement needs at the intersection will only increase as new development in the area continues to contribute additional traffic to George Elmer Dr.

Are there any site requirements/ Potentially Affected Interest (PAI) Coordination:

Neighborhood outreach, developer coordination required.
