Project Rating	Department		Yes	No		
	Public Works					
Plan	Storm Water	Is the project APPROVED for Fiscal Year 2024?			FUNDED?	

**Summary Description and rationale of project and funding sources:**

Stormwater quality improvements, required by our MS4 Permit, include maintenance of existing storm water infrastructure and addition of new, necessary infrastructure to remove pollutants prior to discharge into our local waterbodies. We have identified multiple improvements that will reduce roadway overtopping, premature asphalt deterioration, erosion, sediment pollution, and improve overall water quality: South Hills ARPA, South Hills Stormwater System Outfall and Bitterroot Swale, City of Missoula Stormwater Facility and Operations Plan - Phase 2 (Facility Plan), and Majestic Storm Drain Improvements.

**History & Current Status: Impact if Cancelled or Delayed**

If any of the projects are delayed or cancelled it will directly affect compliance with the City's MS4 Permit. Most of the streams and rivers that receive storm water discharge are considered impaired by the Montana Department of Environmental Quality. There are approved Total Maximum Daily Loads and Wasteload Allocations assigned to these waterbodies and the MS4. The City is required to address the causes of impairment and reduce pollutant loading to these impaired systems.

**Are there any site requirements/ Potentially Affected Interest (PAI) Coordination:**

Potential for coordinating private property access, obtaining stream permitting and environmental regulatory compliance.
