RE: Illegal dumping of fluorescent tubes.

I LIVE AT 808 SOUTH RUSSELL

Recently our neighboring house on corner of Russell and 6th street (802) has been vacated and occupants have moved to the street in a trailer. They use grounds as a toilet. What my biggest concern is a large dump of old style(very hazardous) fluorescent lighting. My husband was an electrician and knows this is considered toxic waste. We called health department Monday and left msg at Department

Of Transportation which owns the now abandoned house. Once the cardboard boxes break up in rain and snow removal will be difficult without breakage and leakage if mercury etc. Lack of concern by MDT is negligence. Thank you for your attention to my concern .

The city of Missoula environment doesn't need a toxic clean-up.
