**Subject:** Re: Missoula City Council & MDT

Good afternoon Joan,

I am the chair of the Public Works and Mobility committee. I think this committee might be the best venue for MDT updates to council (all council members are members of the committee). I'll follow up with a call tomorrow so we can coordinate a date for an update.

Thanks for reaching out and look forward to a presentation from MDT!

Good afternoon,

I am looking to see if we can schedule a regular time for the Montana Department of Transportation (MDT) to provide an update on projects to the City Council. Bob Vosen, District Administrator for District 1, would like to provide an update to the City Council on MDT related projects that are occurring or upcoming for your City.

We would like to set this up to be during one of the Councils public meetings, at a minimum of twice a year. Our goal is to keep the local government informed and create an open channel for communication, while also providing an open forum for the public to be kept up to date. Bob, or another representative of MDT, would provide a brief update on projects and be available to answer any questions. Our estimate is that this presentation will take approximately 15-20 minutes of the Councils time.

This is something we'd like to get on the schedule to occur annually sometime in the early winter and again early summer. We would like to be put on an upcoming agenda to bring the Council current and then set a regular schedule for an update twice a year.

Would you be able to help with getting this set up or can you direct me to who is able to assist?

**Thank you,**
