 - Messages from City Council Member Jon Wilkins (deer, support for legislation)
5. Public comment on non-agenda items

*** Mission Statement: The mission of the Upper Rattlesnake Land Use Sub-Committee is to consider and recommend solutions to issues and concerns relating to land use in the Upper Rattlesnake (including recreational, residential, open-space, construction-related or other relevant land uses) that may be identified by the UR Neighborhood Council, UR residents, or the Sub-Committee itself; to advise the URNC on the use of existing Missoula County and Missoula City authority to control development and redevelopment; and to identify laws, policies, charters and practices related to land use or development that Missoula governing bodies may wish to use. (Help clarify those last 2 sections in italics!! Perhaps we keep it broad and leave them out?) Recommendations are made in view of the public health, safety, quality of life and general welfare of Upper Rattlesnake residents.**

The Upper Rattlesnake Land Use Sub-Committee will, among other things: (1) advise the URNC on land use issues as they arise, 2) monitor enactment of new state and county regulations pertaining to land use that impact the Upper Rattlesnake 3) monitor effectiveness of existing Missoula land use ordinances and regulations and suggest modifications, 4) provide information to Missoula residents and developers about the UR's land use goals, regulations, policies, and practices. 5) research and identify land use priorities for UR residents, to be approved on an annual basis
