

CAPITAL IMPROVEMENT PROGRAM
City of Missoula CIP Project Request Form FY 2014-2018

Program Category:	Project Title:		12 Project #	13 Project #	14 Project #
Street Improvements	Grant Creek / I-90 Intersection Improvements				S-03

Description and justification of project and funding sources:

The project includes widening Grant Creek Road at the intersection with the I-90 interchange. The current roadway has a single southbound lane north of the intersection with two receiving lanes south of the intersection, and the project would add capacity to the Grant Creek Road by adding two additional south bound lanes north of the intersection. The final configuration would be two southbound thru lanes and one dedicated right turn lane north of the intersection. This additional lane capacity will decrease existing queuing and delay and increase safety and operation of the entire interchange along with air quality benefits from a reduction in idling vehicles. A Federal Lands Access Grant was submitted in January, 2013. Design is planned to occur in FY14 with construction in FY15.
