Program Category:	Project Title:		14 Project #	15 Project #	16 Project #
Wastewater Facilities	Broadway Interceptor (North of Russell Street Bridge)		WW-09	WW-08	WW-08

Description and justification of project and funding sources:

The reconstruction of Russell Street will cause evaluation of the existing 30" diameter Broadway Interceptor sewer line. The existing sewer line is planned to be reconstructed or relined for approximately 75 feet. Both the upstream and the downstream portions of this interceptor were previously reconstructed. This portion was not included in that project due to the disruption of traffic on Russell Street. This project will be done in conjunction with the reconstruction of Russell Street.

Design and construction to be funded in FY2016 and FY2017 by Sewer Development Fund.
