1. Request Rationale:				
Our rescue harnesses and	absorbers are past their useful	life of 10 years. We are requesting a one-time purcharse to replace the	e outdated, unsaf	e equipment.

The body armor kits are critical personal protective equipment identified in response to Active Shooter events. These items are required for responders that will be operating in warm zones of an Active Shooter/Hostile Event Response. The Body Armor Kit includes 4 Level III-A NIJ certified ballistic vests and 4 mesh ballistic helmets.

2. Service Delivery Impact:

We would be required to remove the outdated harnesses and absorbers from service until such time as replacements could be purchased due to safety issues and compliance with NFPA 1006. Removal of the expired equipment would hinder our ability to have the necessary equipment available for a technical rescue. Placing both firefighters and the public at risk. Body Armor Kits will protect our firefighters as well as benefit taxpayers through a reduced potential for firefighter death or injury claims.

3. Personnel Requirements (# FTE's required):	
None
