Community Service	Waterproofing parking structures		CS-24	CS-24	CS-21

**Description and justification of project and funding sources:**

Exposed concrete parking structures need to be waterproofed in order to ensure the longevity of the structure. Both Central Park, the parking structure located at 128 W. Main and the Bank Street Structure will need to have a waterproof coat applied to the entire surface of the upper exposed level in order to keep the structure in safe, operable condition for the future. In spite of the costs involved, if this is not done in a timely manner, deterioration will occur and eventually result in great repair costs in the future.
