Elevation Certificate for Lot 10 of Stream Side Subdivision
2612 Roderick Way
Section D – Continued

The FEMA Form 81-31 is not applicable in areas designated as Zone X (areas determined to be outside 500-year floodplain). This certificate is being completed as a condition of subdivision approval imposed by the City of Missoula on the Stream Side subdivision. The condition requires "the lowest floor, including basements, of any structure anywhere on the property shall be at least 2' above the 100-year flood elevation of the Clark Fork River. Crawlspace floors may be at or above the elevation of the 100-year flood if they do not contain mechanical equipment. Elevation certificates shall be submitted documenting the lowest floor and utility elevations are a minimum of 2' above the base flood elevation".

The 100-year flood elevation on the adjacent Clark Fork River area is interpolated to be 3149.58 based on a NAVD 1988 datum.

The finished floor of the residence will be constructed to elevation 3155.6 which is 4.0 feet above the minimum required. The crawl space will be at an elevation of 3150.6 which is 1.0 feet above the minimum required. The garage floor will be constructed to elevation 3153.8 which is 4.2 feet above the minimum required.

Sheet 2 of 4 of the plans for Stream Side Lot 10 provided to this office (dated 11-14-2011) indicates the mechanical equipment shall be located in a closet equal to or above the garage top of slab at an elevation of 3153.8 feet, which is 2.2 feet above the minimum required by the subdivision condition.

When constructed according to the plans furnished to this office the structure will meet the condition imposed by the subdivision approval.
