Elevation Certificate for 2628 Roderick Way (Lot 12 of Streamside)  
Section D – Continued

The FEMA Form 81-31 is not applicable in areas designated as Zone X (areas determined to be outside 500-year floodplain). This certificate is being completed as a condition of subdivision approval imposed by the City of Missoula. The condition requires that "the lowest floor, including basements, of any structure anywhere on the property shall be at least 2 feet above the 100-year flood elevation of the Clark Fork River. Crawlspace floors may be at or above the elevation of the 100-year flood if they do not contain mechanical equipment. Elevation Certificates shall be submitted documenting the lowest floor and utility elevations are a minimum of 2' above the base flood elevation."

The 100-year flood elevation on the adjacent Clark Fork River area is interpolated to be 3149.58 feet based on a NAVD 1988 datum.

It is recommended that Lot 12 have a finished floor elevation of 3154.50 feet, which is 2.92 feet above the minimum required. The crawl space will be at an elevation of 3149.6 feet, which is the minimum required. The garage floor will be at an elevation of 3153.20 feet.

When constructed according to the plans the structure will meet the conditions imposed by the subdivision approval.
