Elevation Certificate for Lot 22 Streamside Subdivision
_____ Roderick Way
Section D – Continued

The FEMA Form 81-31 is not applicable in areas designated as Zone X (areas determined to be outside 500-year floodplain). This certificate is being completed as a condition of subdivision approval imposed by the City of Missoula. The condition requires the lowest floor, including basements, of any structure anywhere on the property shall be at least 2' above the 100-year flood elevation of the Clark Fork River. The condition indicates crawlspace floors may be at or above the elevation of the 100-year flood if they do not contain mechanical equipment.

The 100-year flood elevation on the adjacent Clark Fork River area is interpolated to be 3149.58 based on a NAVD 1988 datum. The residential structure on Lot 22 has a crawl space floor at an elevation of 3149.94 feet. The first floor of the structure is at 3154.43 feet and the garage floor is at 3152.38 feet. The mechanical equipment in the garage is at an elevation of 3154.43 feet.

The structure meets the conditions in the subdivision approval.
