Summary Description and rationale of project and funding sources:							
<p>MFD passed the mill levy providing for the addition of response personnel, we have added temporary bunk structures in Station 4 training room. MFD is requesting a 14' x 30' addition at the rear of the Maintenance offices which will be used as bunks until Station 6 is completed and occupied. When Station 6 is completed the building will be converted into much needed maintenance offices and large tools storage. The use of the Station 4 training room is critical for daily training and ongoing training needs within the MFD.</p>							
History & Current Status: Impact if Cancelled or Delayed							
<p>The expansion to a 6th engine company with the upcoming Station 6 build has successfully added the necessary personnel to staff the engine company ahead of the Station design and build. The 6th engine company will be housed at Station 4, we have currently made temporary housing in the Training room to accommodate the additional bunks needed for personnel. Station 4 training room is a critical link to our daily and ongoing trainings to maintain and advance MFD's response skills. Station 4 is the training station for all fire based training, the training room classroom space is critical to accommodate the crew trainings. If this project is not funded we must keep the temporary structure inside the training room effecting our ability to use the training room for required trainings.</p>							
Are there any site requirements/ Potentially Affected Interest (PAI) Coordination:							
<p>Excavation for the 14'x30' structure at the rear of the maintenance facility with no impacts on (PAI)</p>
