Leverage	Parks & Recreation		Is the project APPROVED for Fiscal Year 2026?			FUNDING?		
Summary Description and rationale of project and funding sources:								
This proposed project will replace select asphalt tread segments where there is extensive damage from age or tree roots and provide for sealing minor cracks and seal coating the entire 0.86 miles of paved trail. If the grant application is successful, the project will address safety and potential liability concerns, improve the quality of the trail tread for a better user experience and extend the useful life of the trail. Fish Wildlife and Park's Trail Preservation grants provide a meaningful opportunity to leverage local funding for cyclical asphalt maintenance on City trails.								
History & Current Status: Impact if Cancelled or Delayed								
The Greenough trail is an important active transportation route for residents living in the Rattlesnake Neighborhoods to safely access the park, downtown, schools, and adjoining neighborhoods. Cancellation or delay will not address safety and potential liability concerns nor increasing use. Delay or cancellation means project costs will increase over time and the scope of work may dramatically increase as the asphalt deteriorates. Well maintained trails optimize the benefits for community and environmental health, carbon emissions, equity, and cost of living. Current Status: <b>Grant was not awarded. Considering reapplying.</b>								
Are there any site requirements/ Potentially Affected Interest (PAI) Coordination:								
Parks and Recreation will work with the Rattlesnake Neighborhoods to minimize trail closures and disruption of trail uses. - primarily through scheduling for summer construction.
