Summary Description and rationale of project and funding sources:									
Reconstruction of Lower Miller Creek Road (LMCR) to include curb/gutter/sidewalk, bike lanes, storm drainage improvements resulting in a complete street from Linda Vista Blvd. to Jack Dr. Since the projects inception, staff reached out to the neighborhood leadership team and heard from them that additional right-of-way improvements to Bigfork Rd. adjacent to Maloney Ranch Park would be acceptable to include in the project. The proposed curb/gutter, boulevards, sidewalk and shared use path improvements would enhance the safety of school kids crossing Bigfork Rd., define on-street parking, add boulevard trees, create an ADA complaint sidewalk, and generally complete the transportation system for the entire area. These Bigfork Rd. improvements along with the inclusion of the roundabout at the LMCR/Old Bitterroot Rd. intersection, along with adding SID administration costs and Easement negotiation costs-to-cure have increased the total cost of this project. The majority of construction is planned to be funded through a Special Improvement District with Transportation Impact Fee and developer contribution being additional funding sources.									
History & Current Status: Impact if Cancelled or Delayed									
Provides improved safety and access to Jeanette Rankin Elementary School, existing residences, and previously approved and planned subdivisions. Project is currently in Final Design phase. Delay increases the cost of construction due to escalation of labor and materials and increases the estimated total assessment cost to properties within the SID/Impact Fee District.									
Are there any site requirements/ Potentially Affected Interest (PAI) Coordination:									
Some right-of-way/easement acquisition is required. Neighborhood, schools, area developers, and private property owners included within SID boundaries are potentially affected interests.
