<b>Summary Description and rationale of project and funding sources:</b>							
<p>This project was included in the 2025 CIP with a placeholder budget. A small grant was received to pay for a Preliminary Engineering Report, which has developed a recommended alternative and estimated project budget. The preferred alternative would install a new large lift station and two new parallel force mains under the Clark Fork River. The project would provide for additional growth capacity in the collection system on the south side of the river.</p>
