**Summary Description and rationale of project and funding sources:**

Missoula's growth is occurring on the west side of town. We would like to drill an additional water supply well in that area to provide additional peaking capacity as well as to provide more redundancy of water supply north of the Clark Fork River. Wells are difficult to site due to separation requirements from sanitary and storm sewer lines. The West End Farms Park offers a unique opportunity of City-owned land that can meet those separation requirements, in an area where well capacities are expected to meet our needs.
