Summary Description and rationale of project and funding sources:							
<p>The City Wastewater Resource Recovery Facility (RRF) plays an integral role in the protection of vital surface water resources. Expansion, renovation, and upgrades of existing wastewater facilities is critical for continued environmentally sound and planned growth of our community. All of the major pieces of equipment at the plant are between 20-60 years and many components need to be replaced over time. Plant staff have a list of deferred maintenance projects that have not been addressed previously that have an estimated cost of more than \$3 million. The specific projects are listed in the recently completed wastewater facilities plan. These are typically small projects less than \$100,000 which will be funded with utility enterprise funds.</p>
